

Product Data Sheet

multimazak®

Neon spray paint for tree and wood marking

Intended Use:

In forestry, such as for marking fresh wood and tree bark, marking trees to be felled, marking standing trees, marking on timber stockyards, marking trees for inventory purposes, marking trees for hiking trails, marking beams, boards, pallets, supports. It can be used in other areas, such as for marking topographic points, marking in geodesy: marking control networks, point or line marking

Advantages:

- ✓ The product meets the requirements of the German Forestry Institute (KWF)
- ✓ Available in seven vibrant colours
- ✓ Durability of the tree marking: up to 12 months.
- ✓ Precise marking - minimised paint mist formation.
- ✓ Complete can emptying - even at low temperatures.
- ✓ Good adhesion to absorbent and moist substrates, and high resistance to sunlight exposure.
- ✓ A special ball in the can allows thorough mixing.
- ✓ The paint's composition does not include toluene or heavy metals.
- ✓ Recyclable packaging.

Method of use:

Shake out the can for about 2 min before application. Spray from a distance of 10 - 15 cm.

Storage:

store away from heat sources, hot surfaces, sparks, open flames and other sources of ignition. Do not smoke. Protect from sunlight. Do not expose to temperatures exceeding 50 °C.

Safety measures:

Do not spray over an open flame or other ignition sources. Do not pierce or burn, even after use. Avoid inhalation of vapor/spray. If you feel unwell, contact a POISON CENTER.

Expiration: 10 years from the date of manufacture.

Content: 500 mL aerosol can
